

**SPECIFICATION AMENDMENTS**

Kindly amend specification paragraph 0122 as follows:

*Ar*

[0122] The actual torque or engine actual torque produced or theoretically produced by the load on the clutch apparatus is determined and is indicated as signal 62. That engine actual torque 52 62 is subtracted from engine target torque 64 in step 66, and on the basis of the torque difference 68, and a corresponding rotational speed 72 is determined in accordance with engine characteristic 70.
